Special Consultations:

- **Bill 9**, An Act to increase Québec's socio-economic prosperity and adequately meet labour market needs through successful immigrant integration (Order of reference given on 19 February 2019).

COMMITTEE ON HEALTH AND SOCIAL SERVICES

COMMITTEE ON TRANSPORTATION AND THE ENVIRONMENT

Part 5

WRITTEN QUESTIONS

Questions already placed on the Order Paper
are published each Wednesday

- (24) Mr. Bérubé (Matane-Matapédia) – **19 March 2019**
To the Minister of Municipal Affairs and Housing

The municipality of Lac-au-Saumon is undertaking a permanent groundwater supply project that is estimated to cost between 6 and 7 million dollars. The municipality's main water source is Lake Angus. However, last summer's drought brought the water level down to below the reservoir valves' normal range. Since this lake can no longer meet the needs of the citizens and the municipality, the municipality is using Lake Au Saumon as a temporary water source with a temporary pump to get its water supply during the winter. The installation of a temporary pump costs approximately \$250,000. The municipality of Lac-au-Saumon applied for funding from the Ministère de la Sécurité publique, but the request was immediately denied as it did not fall within the definition of "disaster" or "climate crisis" under existing programs. This small community of 1406 inhabitants must therefore bear the costs on its own.

My question is as follows:

- Will the Minister of Municipal Affairs and Housing consider adding a sub-component to component 1 (Water Infrastructure) in the Programme d'infrastructures municipales d'eau to include an emergency fund during the water infrastructure transition?

- (25) Mr. Bérubé (Matane-Matapédia) – **19 March 2019**
To the Minister of Culture and Communications

The Camp musical du lac Matapédia is a summer camp where young people aged 7 to 17, with or without experience in the performing arts, are given the opportunity to receive intensive training in music, dance and theatre on the shore of Lake Matapédia in Sayabec. As the camp is very popular among young people throughout Québec, it must now manage exponential growth.

On the one hand, the Camp musical du lac Matapédia must deal with inequity in the funding of its activities in comparison with other Québec music camps. In 2016-2017, the organization received \$15,700 compared to \$55,800 for the Camp musical Saint-Alexandre, located in the western Bas-Saint-Laurent region. In 2017-2018, the Camp musical du lac Matapédia got the same amount as the previous year, while the Camp musical Saint-Alexandre was given an additional amount of \$34,326 for a total financial contribution of \$90,126. Though additional funding must not be recurrent, the Camp musical Saint-Alexandre received financial assistance in the amount of \$91,528 in 2018-2019. For the same period, the Camp musical du lac Matapédia received a slight increase, totalling \$26,316.

On the other hand, the Camp musical du lac Matapédia must build and restore deteriorated infrastructure in order to continue its activities. For instance, the camp does not have a drinking water infrastructure or septic system. Furthermore, lack of space obliges young people to practice in mosquito net shelters, rain or shine. Underfunding prevents catching up with repairs to deteriorating infrastructure.

My questions are as follows:

- Will the Minister of Culture and Communications commit to taking a closer look at the issue of inequity of financial assistance for music camps?
- Would it be possible to establish financial assistance in the program “Aide au fonctionnement pour les organismes de formation en art” to include infrastructure investment?

(26) Mr. Bérubé (Matane-Matapédia) – **19 March 2019**

To the Minister of the Environment and the Fight Against Climate Change

Common hogweed is an invasive alien plant in the Matapédia valley. The sap contains toxins that, combined with exposure to light, cause severe and painful second degree dermatitis upon contact. Symptoms usually appear between 24 and 48 hours after contact with skin. Inflammation can last anywhere between 3 to 5 days and scars may remain approximately six years. Resembling cow parsnip and giant hogweed, common hogweed is increasingly taking the place of native species, which results in biodiversity loss in both natural and urban environments.

The Ministère de l'Environnement et de la Lutte contre les changements climatiques' Program to Fight Against Invasive Alien Plant Species provides financial assistance for initiatives aimed at reducing the threats and impacts of invasive alien plants on biodiversity and Québec's natural environments. However, the action plan does not consider other environments and only includes three invasive species: common reed, giant hogweed and Japanese knotweed.

My questions are as follows:

- Will the Minister of the Environment and the Fight Against Climate Change expand the action plan to include other invasive plants?
- Will the Program to Fight Against Invasive Alien Plant Species include urban environments, since this is also a matter of public health?

(27) Mr. Gaudreault (Jonquière) – **19 March 2019**
To the Minister of Health and Social Services

Food allergies are on the rise. In Québec, 8% of children suffer from food allergies. In schools, where these children eat at least one of their meals each day, there is currently no legal framework in Québec that enables the standardization of preventive measures and treatment of severe allergic reactions. Québec is the only Canadian province without a legal framework to standardize reception measures for allergic children and the prevention of severe reactions.

Last 14 June, the outgoing Member for Hochelaga-Maisonneuve, Carole Poirier, introduced Bill 1197 to require educational institutions to adopt practices for managing cases of anaphylaxis.

My questions are as follows:

- Do you intend to support the introduction and passage of such a bill during the current parliamentary session?
- What actions do you intend to take in the coming months to ensure the standardization of reception measures for allergic children and the prevention of severe reactions?
