Order in compliance with the Standing Orders

Surveillance of public bodies and accountability:

- Hearing the Société de l'assurance automobile du Québec on its administrative management, activities and policy directions.

Part 5

WRITTEN QUESTIONS

Questions already placed on the Order Paper
are published each Wednesday

- (211) Mrs. Massé (Sainte-Marie–Saint-Jacques) – 15 November 2016
To the Minister of Energy and Natural Resources

On 16 October 2014, the MERN released the Government action plan for the inspection of Québec's inactive oil and gas wells. With special attention given to the 700 abandoned wells on the territory, this action plan indicates that the Government wants to pick up the pace to complete the inspection of inactive wells by 2017 and begin the restoration of problem sites as soon as 2015. Moreover, the Government specifies in this plan that, for the sake of transparency, it will make the information on inactive wells available to citizens as work progresses on its interactive map.

Within the framework of this action plan, the Government also signed an agreement with AQLPA and CMAVI collective on 17 November 2014, mandating these groups to locate and inspect all inactive wells within the St. Lawrence Lowlands. This agreement was cancelled prematurely in January 2016 and citizens haven't had any further news regarding the status of work.

As I share citizens' concerns regarding this matter, and more particularly those of CMAVI, I would like the Minister of Energy and Natural Resources to answer the following questions:

1. What is the current situation regarding the hundred or so wells that have been inspected by the department since 2011, as written in the "Plan d'action pour l'inspection des puits inactifs" and why has this information not already been made public via the department's interactive map?
2. How does the Minister intend to complete the inspection and documentation of the 700 inactive wells by 2017?
3. When does the Minister intend to make public the work carried out by the citizens and the AQLPA, who had managed to find and document more than one hundred inactive wells and had discovered that approximately thirty of them had environmental issues?
4. Of these thirty-odd problem wells, how many have been taken over by the department in order to apply mitigation or corrective measures?
5. What does the Minister consider to be a problem well?
6. Does the Minister believe that simply putting a fence around a problem well, as is the case for the inactive well (A-190) located in Ste-Françoise in the Centre-du-Québec region, ensures the safety of citizens and takes care of significant leakage problems?
7. What about the abandoned wells located under built environments? How many inactive wells are in this situation?
