## **EXPLANATORY NOTES**

*This bill amends the Mining Act in a number of ways, mainly to stimulate mining exploration. More particularly, with respect to claims, it will no longer be possible to make a payment instead of carrying on mining exploration; the area of the land in respect of which any excess amount disbursed may be used to renew other claims is reduced; it will no longer be possible to use excess amounts disbursed to carry on mining exploration under a mining lease or mining concession to renew a claim; and, lastly, the period during which excess amounts credited to a claim may be carried over is limited to 20 years.*

*In addition, the scope of the financial guarantee that must accompany a rehabilitation and restoration plan is increased.*

*Provisions are introduced that permit the Minister to exclude certain zones from mining activities and to refuse to grant certain types of mining rights in order to avoid conflicts with other uses of the territory.*

*Moreover, in order to advance geoscientific knowledge in Québec, claim holders will henceforth be required to report to the Minister on all exploration work performed and for which an allowance was granted under the Mining Duties Act.*

*A public consultation is required before a mining lease, a peat lease or a lease to mine surface mineral substances, required for carrying on an industrial activity or to engage in commercial export, is issued. Obligations relating to exploration for and discovery of uranium oxide are imposed.*

*The bill grants landowners the ownership of the surface mineral substances on private land that belong to the State.*

*Lastly, the penalty system under the Mining Act is updated and various technical amendments are made to that Act.*
